## Paul Wardell Pro Tip

# Set Up

## The importance of alignment

Getting yourself properly aligned to the target is an imperative part of the set up

Remember everything you do will revolve around the ball and your intended target

## Get a routine

Pick a mark between your ball and intended target about 2-4 feet in front of the ball. Line up the club face to this mark

Then take your stance, aligning your feet parallel to your target line

You are now free to swing back and through to the target without having to re-route your swing

## Special Offer For Members

Paul is offering members a 1 hour golf lesson for only £36.

Valid for September & October. Please contact Paul to reserve a lesson time.
